DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see amendment, filed 9/30/2004, with respect to claims 1-3, 14, 18, 20-21, 23-25 have been fully considered and are persuasive. The rejections of these claims are withdrawn.

Allowable Subject Matter

2. Claims 1-3, 5, 7-10, 14 & 18-29 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record fails to teach or fairly suggest the combination of all limitations of claim 1 that includes "...computing scale factors for other channel of the pixel, the scale factors computed according to fixed offset values and values of the first color channel before and after the tone mapping function is applied, the fixed offset values offsetting the effect of noise in calculating the scale factors; and applying the scale factors to the other color channels of the pixels."

Regarding claims 2-3, 5, 7-10, these claims are dependent of claim 1.

Regarding claim 18, the prior art of record also fails to teach or fairly suggest the combination of all limitations of claim 18 that includes "...computing scale factors for other channels of the pixels, and applying the scale factors to the other color channels of the pixels;

wherein the scale factors are computed according to noise balancing terms and changes in values of the first color channel, and wherein the first color channel most closely matches relative luminance response of the human visual system.”

Regarding claims 14, 19-20, 24, 26, 27, these claims are dependent of claim 18.

Regarding claim 21, the prior art of record also fails to teach or fairly suggest the combination of all limitations of claim 21 that includes “...computing scale factors for other channels of the pixels, the scale factors computed according to noise balancing terms and values of the first color channel before and after applying the function, the processing further including applying the scale factors to the other color channels of the pixels; wherein the first color channel most closely matches relative luminance response of the human visual system.”

Regarding claims 22-23, 25, 28-29, these claims are dependent of claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
